

During November 2025, Allen House Business Centre began refurbishment works to the East 3 entrance and staircase.

As a family-run business, pride and care go into every detail. Owners Jeff Allen and Carl Allen were personally hands-on throughout the refurbishment, with Carl designing and building the staircase himself—an enduring reflection of the care, craftsmanship, and personal touch that define what Allen House Business Centre offer.

We are proud of our listed building; we understand the importance of moving forward with modern expectations while preserving the original character and charm that make Allen House unique.

This refurbishment represents our ongoing commitment to protecting the future of the building - ensuring it remains attractive, functional, and fit for continued business growth.

The upgraded East 3 entrance will enhance first impressions and improve the experience for both tenants and their visitors. In doing so, we aim to ensure Allen House Business Centre remains a first-choice for those seeking a professional home for their business.
